

THE EPOCH OF GALAXY QUENCHING

at the KAVLI INSTITUTE for COSMOLOGY, CAMBRIDGE, UK

SOC

Asa Bluck (Co-chair)
University of Cambridge, UK

Emma Curtis-Lake (Co-chair)
University of Cambridge, UK

Michele Cappellari
University of Oxford, UK

Stephen Eales
University of Cardiff, UK

Sara Ellison
University of Victoria, Canada

Julie Hlavacek-Larrondo
University of Montreal, Canada

Roberto Maiolino
University of Cambridge, UK

Yingjie Peng
Peking University, China

Joop Schaye
University of Leiden, Netherlands

Deborah Sijacki
University of Cambridge, UK

LOC

A. Bluck (Co-chair)

S. Brereton (Admin)

A. Concas

M. Curti

E. Curtis-Lake (Co-chair)

P. Downing (Admin)

G. Jones

N. Kumari

S. Brownson

A. Fluetsch

C. Hayden-Pawson

J. Piotrowska

J. Trussler

J. Witstok

Image credits from left, going clockwise: Illustris simulation. Abell 370 - NASA, ESA, A. Koekemoer (STScI), M. Jauzac (Durham University), C. Steinhardt (Niels Bohr Institute), and the BUFFALO team. Messier 82 - NASA, ESA, and The Hubble Heritage Team (STScI/AURA). Black Hole - EHT Collaboration. Galaxy interaction - vdHoven/NASA/JPL-Caltech/R. Kennicutt (Univ. of Arizona)/DSS. Messier 87 - Chris Mihos (Case Western Reserve University)/ESO; A. Longobardi (Max-Planck-Institut für extraterrestrische Physik)/C. Mihos (Case Western Reserve University)/ESO; ESO, IAU and Sky & Telescope.

7-11/9/2020
